Mr. Steve Jobs  
Hiring Manager  
Apple Inc.  
Curpertino, California, USA

Sir:

I am excited to apply for the Back-End Developer position at Apple Inc. As a second-year BSIT student with hands-on experience in server-side development, I am eager to contribute my skills in PHP, MySQL, and RESTful API integration to your team.

Thank you for your time. I'd love to discuss how I can contribute to Apple's legacy. Looking forward to your response.

Very truly yours,

Armando B. Sagayoc Jr.
