

BRAVE HEART CUISINE POINT OF SALE SYSTEM

Date: October 25, 2024

Presented by: Armando B. Sagayoc Jr

Executive Summary

• Brave Heart Cuisine, a rapidly expanding restaurant, faces challenges with its manual transaction system, resulting in slow order processing, billing errors, and inventory tracking issues. The proposed system aims to automate key functions such as order taking, payment processing, and inventory management to enhance customer experience, operational efficiency, and real-time data for better decision-making.

History of POS Systems

- **1879:** The first cash register was invented by James Ritty.
- **1973:** IBM introduced the first computer-based POS system for restaurants.
- **1986:** Gene Mosher created the first touchscreen interface for POS
- **1990:** Microsoft released the first commercial POS client for restaurants

Project Timeline

Budget Breakdown

Breakdown

Total Budget
6,837,600
PHP

Category	Budget
Software Development	3,360,000 PHP
- Project Management	1,008,000 PHP
QA Testing	•1,344,000 PHP
Hardware	•336,000 PHP
Miscellaneous/Contingency	•621,600 PHP

Risk Management

Risk

Delayed Deliverable: Potential delays in system development
(Medium risk).

Budget Overrun: Unexpected development costs (High risk).

Integration Issues:
Compatibility with third-party systems (Medium risk).

Conclusion

- The Brave Heart Cuisine Point of Sale System will streamline catering operations, enhance customer experiences, and improve efficiency. By automating processes and leveraging advanced technologies, Brave Heart Cuisine will strengthen its market position, achieve customer satisfaction, and see a positive return on investment.

BIG THANKS
