

# SOCIAL ISSUES ADVOCACY IN IT

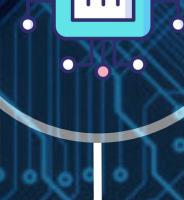

## Digital Divide

The gap between those who have access to modern technology and those who do not. Advocacy focuses on making internet services and digital devices more affordable and accessible, especially in underserved communities.

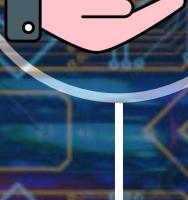

## Cybersecurity & Privacy

The protection of personal data and online rights. This includes raising awareness about cyber threats, promoting digital literacy, and pushing for stronger privacy laws to safeguard users from data breaches and unauthorized surveillance.

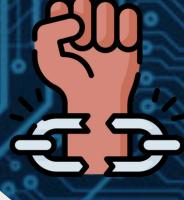

## Ethical AI

The responsible development and use of artificial intelligence. Advocacy efforts aim to reduce bias in AI systems, ensure fairness, and promote transparency in decision-making processes to prevent discrimination and misuse.

## Internet Censorship & Freedom

The right to access information and express opinions online without unjust restrictions. Advocacy in this area fights against internet shutdowns, online censorship, and promotes policies that uphold freedom of speech in the digital space.

## Environmental Impact of IT

Addressing e-waste and high energy consumption by promoting sustainable technology and eco-friendly practices.

"Innovate Responsibly, Connect Equitably, Protect Digitally."
